## EXPERIENCE

### Front End Developer

**IThire** | 03/2021 — Present | Yerevan

I am currently working on IThire's core product, where I focus on creating a user-friendly interface. In addition to this, I am also involved in several side projects. As a frontend developer, my main responsibilities include:

- **UI Development:** I build the visual parts of websites and applications that users interact with. I use HTML, CSS, and modern layout techniques such as Flexbox and Grid to create responsive interfaces.
- **Frontend Logic Development:** I implement interactive and dynamic elements using JavaScript and the ReactJS library. I'm also familiar with Redux for state management and TypeScript, and I can use them in projects when needed.

### Freelance Projects

**Freelancer** | 2022 — Present

- Work on various freelance projects in web development, creating responsive and dynamic applications.
  - Solve different technical challenges to enhance problem-solving skills.
  - Research and implement modern approaches in web development.
- 

## SKILLS

- **Frontend:** HTML, CSS, Sass, Bootstrap, JavaScript, ReactJS, TypeScript
  - **State Management:** Redux
  - **Backend:** PHP, Laravel
  - **Databases:** SQL, MySQL
- 

## LANGUAGES
